

A theory of change for improving equity in breast, cervical and bowel cancer screening in Victoria

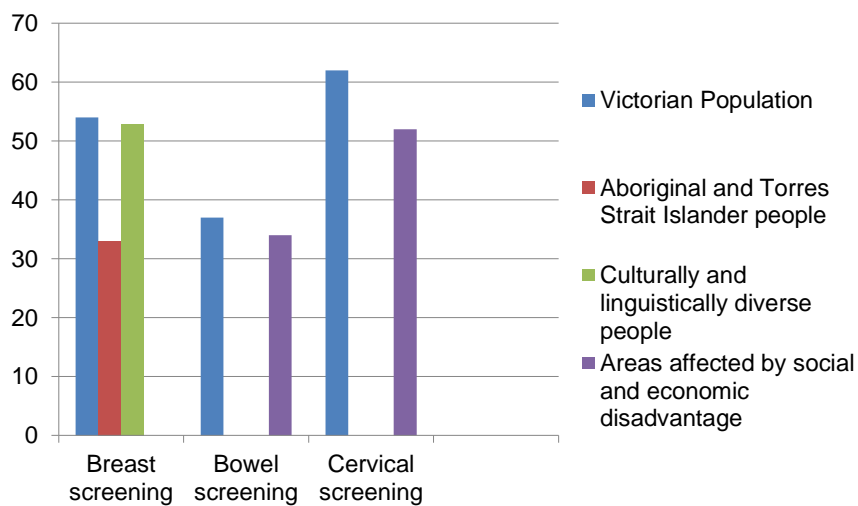

Change pathways for:

1. Service Delivery
2. Enabling Policy Environment
3. Recruitment and communications

Rachael Andersen, Manager Screening and Cancer Prevention,
Victorian Department of Health & Human Services

Inequities in cancer screening programs (2012-2013)

Theory of change – a collaborative process

- A collaborative process with cancer screening program partners
- Collective vision set - **Equity in the prevention and early stage diagnosis of breast, cervical and bowel cancer by 2020**
- 3 Change pathways for (1) Service Delivery, (2) Enabling Policy Environment, and (3) Recruitment and Communications
- Each pathway articulates the ultimate conditions required for equity, and their supporting preconditions.
- Qualitative planning tool to help prioritise actions

Theory of change – pathways map
