

Territory Kidney Care

December 2017 Update

Patient Consent Model

A proposed patient consent model based on legal advice was distributed to stakeholders in November. On the 6th of December, a meeting was held for Aboriginal Community Controlled Health Organisations to discuss this model and seek feedback. Feedback received will continue to refine this model to ensure it meets the needs of health services who are intending to participate in Territory Kidney Care.

Technical Study

The Technical Study and Functional Overview draft documents have been distributed to technical staff within health services. A technical meeting was held on the 29th of November to discuss the proposed design and seek input from staff who currently support health services with Communicare or Department of Health systems. Early planning for a proof of concept has commenced.

The team at Menzies School of Health Research thank you for your ongoing support and wish you a safe, healthy and happy festive season.

The project and team

Phase One - Development Phase

April 2017 to March 2018 is allocated to stakeholder engagement and confirming the scope of a system that would support increased screening, identification and management of kidney disease.

Project Governance

A Steering Committee with broad health service representation meets monthly to guide the development phase.
